Unincorporated Areas of Counties: 1980-90 Change in Share of Counties (MAP) 37

This report, "1990 Census Brief: Cities and Counties of Utah," is the first in a series of reports which will endeavor to analyze specific data coming from the 1990 Census of Population and Housing. These reports will document important demographic and geographic trends. Future reports will include Minority Populations, Regional Changes in Utah, and Age Distribution. Publication dates for these reports are uncertain and will depend on the release of Census data. Please check with our office (538-1036) regarding future publications.

"Cities and Counties of Utah" is comprised of a number of tables and accompanying figures which present population data for the counties, cities and unincorporated areas of Utah. It is hoped that this report will present data in a way which can be easily understood and used. The report is arranged in three informal sections: total county populations, city populations and unincorporated area populations. Each section is comprised of tables and/or figures relating to the specific subject (i.e. county, city or unincorporated).

The first set of tables present total county populations, and ranks this data according to a number of criteria. The growth of counties in the 1980s was diverse. Washington County grew at a rate of almost five times the state average, while six counties showed an actual loss of population since 1980. The Population Density figure demonstrates very clearly that the Wasatch Front is the center of population for the State.

The populations for the cities of Utah are presented in the second set of tables and figures. The cities have been ranked in a number of ways -- alphabetically, 1990 size, and 1980-1990 growth. The tables also contain a historical time series, dating back to 1950. A complete comparison of cities for the last forty years is not possible because a number of cities were not incorporated in either 1950 or 1990. However, this report has tried to present the most complete record possible of cities' populations. There has been phenomenal growth in some cities of Utah in the last forty years. Ten cities have increased by over 1000 percent during this time. However, 42 cities have actually lost population during the same period.

This section also presents a listing of cities divided into three groups. The first two groups are Metropolitan, which includes Weber, Davis, Salt Lake and Utah Counties; Non-Metropolitan, which consists of all counties except Weber, Davis, Salt Lake, Utah and Washington Counties. The third division is Washington County. Because of the extraordinary growth of this county, it was deemed appropriate to separate it from the rest of Non-Metropolitan Utah.

The Cities section also includes a series of tables which do not include a total listing of the cities. These tables present ranked data for cities over 5,000; a comparison of the 50 largest cities in 1950 and 1990; and shares of cities compared to total state population.

The Unincorporated Areas section presents three rankings of the data. First, the counties are listed alphabetically; second, the counties' unincorporated areas are listed in order of 1990 population size; and finally, each area is ranked by change (1980-90) in share of its county's total population. This section presents some very interesting data which may raise issues regarding the incorporated and unincorporated segments of counties.

Final 1990 Census data has also been received regarding the Salt Lake-Ogden and Provo-Orem MSAs. The populations for the two MSAs in Utah are 1,072,227 and 263,590 respectively.

All of the tables presented in this report are available in Quattro and Lotus. Please contact our office for more information.

FIGURES

U.S. and Utah: 1990 Percent Distribution of Groups and Hispanic Origin Populations 2

U.S.: 1980 and 1990 Percent Distribution of Racial Groups and Persons of Hispanic Origin 3

Utah: 1980 and 1990 Percent Distribution of Racial Groups and Persons of Hispanic Origin 4

U.S. and Utah: 1980-1990 Percent Change in Racial Groups and Persons of Hispanic Origin 5

This report, " 1990 Census Brief: Minorities of Utah," is the second in a series of reports which will analyze 1990 Census data coming from the 1990 Census of Population and Housing. The third Brief will examine the 1990 age distribution detail as soon as it becomes available.

The population counts in this report are subject to possible correction for undercount or overcount. The United States Department of Commerce is considering whether to correct these counts and will publish corrected counts, if any, no later than July 15, 1991.

This report will focus on presenting two types of minority data. First, data is presented by Racial Group classification. The Census has designated five groups: Black; White; American Indian, Eskimo & Aleut; Asian and Pacific Islander; and Other Races. According to Census officials, the vast majority of people classifying themselves in the 'Other Race' category were people of Hispanic origin who felt they did not fit into one of the other four racial categories on the Census form.

The second grouping of data presented is population of Hispanic origin. Persons of Hispanic origin can be of any race. If Hispanic origin population figures are added to the Racial Groups, the total population would be more than 100 percent. In other words, the Hispanic origin classification is an ethnicity category only, and is not intended by the Census Bureau to be a racial category.

Racial and Hispanic origin populations for the United States and Utah show some important differences. Comparing Utah with the U.S., Utah has a lower percent distribution for all minority races and persons of Hispanic origin, except American Indians. When looking at growth rates, Utah and the U.S. differ by group. For example, Utah's growth rates between 1980 and 1990 for Black and Asian & Pacific Islander exceeded those for the U.S. But for American Indian, Other Race and Hispanic origin, the growth rates for the U.S. were greater than those for Utah.

The 1990 Census reported that the total Non-White population of Utah was 6.2 percent of the state's total population. Persons of Hispanic origin totalled 4.9 percent of the state's 1990 population. As expected given total population distribution, the minority populations of Utah -- both Racial and Hispanic origin -- live for the most part in the Wasatch Front Counties of Weber, Davis, Salt Lake and Utah counties. Almost 78 percent of the state population resides in these four counties, which compares with 77 percent of the non-white population and over 83 percent of persons of Hispanic origin residing in the area.

The Black population of Utah is very small -- 0.7 percent of the total population, a count of 11,576. This compares to the U.S. average of 12.1 percent of the population. Weber (1.54 percent) and Davis (1.25 percent) counties are the only two counties which have a Black population that totals more than one percent of

the county population. Only 40 percent of cities in Utah have any Black population, and of those, just 11 cities have a Black population of at least one percent of the total population. Almost 75 percent of the Black population in the state resides in one of five cities along the Wasatch Front: Salt Lake City, Ogden, Clearfield, Layton and West Valley City.

The American Indian, Eskimo & Aleut population of Utah constitutes 1.4 percent of the state population, a count of 24,283. In Utah, almost all of this racial group is comprised of American Indians. The five counties with the largest Indian population are: San Juan (54.35 percent), Uintah (10.51 percent), Duchesne (5.25 percent), Grand (3.07 percent) and Iron (3.05 percent). However, there are fourteen counties that have an Indian population totalling less than one percent of the county population. Over 75 percent of all Utah cities have some Indian population. However, only 30 percent of the cities have an Indian population which is over one percent of the total population. Almost half (44 percent) of the Indians who live in cities live in one of the five following cities: Salt Lake City, Blanding, West Valley City, Provo and Ogden.

Asian and Pacific Islanders in Utah comprise the largest Non-White racial population group in the state, totalling 33,371. The growth in the Asian/Pacific Islander racial group in Utah was 12 percent faster than for the nation (121 percent vs. 107 percent). Utah's Asian and Pacific Islanders now comprise almost two percent of the state's population. Over 94 percent of this group's population live in five counties: Salt Lake, Utah, Davis, Weber and Cache. Within these counties, five cities account for almost 50 percent of the total Asian and Pacific Islander population in the state: Salt Lake City, West Valley City, Provo, Logan and Sandy.

The number of persons of Hispanic origin in Utah increased by over 40 percent in the last ten years, from 60,302 to 84,597. Twelve counties saw an increase of greater than 50 percent in their Hispanic origin populations in the last ten years, but only two counties -- Tooele and Carbon -- show more than 10 percent of the county population being of Hispanic origin.

Release of final 1990 Census data.

The First Summary Tape File, STF-1A, will be released by the Census Bureau between May 1 and August 1, 1991. All of the information available from the 1990 Census short form questionnaire (i.e. age, race & Hispanic origin, marital status, and general housing questions) will be included on the STF-1A. Data are provided down to the block-group level for Utah, its counties, MSAs and American Indian Areas. This release will only be available on computer tape. Other data formats, such as CD-ROM, will not be produced until after July 15, 1991.

All of the tables presented in this report are available in Quattro and Lotus. Please contact our office for more information at (801) 538-1036.

Resident Population Distribution for the United States and Utah By Race and Hispanic Origin: 1990 and 1980
